Nevada Silver Trails	NST-17-51	Pioche Chamber of Commerce	Social Media and Google AdWords' Campaign	\$3,000.00	\$3,000.00	\$6,000.00	Funds will be utilized to market the town of Pioche through social media and drive web traffic to PiocheNevada.com. By continuing a successful social media program and adding a Google AdWords' media buy, the goal is to strengthen Pioche's overall presence on the web.	In 2015, the Pioche Chamber of Commerce updated their Facebook page, and targeted Facebook ads were purchased in order to promote this page. The Pioche page has grown from 63 likes to 657, an increase of almost 700%, and the reach has grown to over 500 per week. This project will ensure that this successful campaign continues, and two new networks are in the process of being opened—a YouTube channel to promote Pioche videos, and a Flickr page, to promote Pioche photography. In addition, this project includes a Google AdWords' media buy, to further strengthen Pioche's web presence.

Pony Express Territory	PE-17-01	Pony Express Territory	PET Administration	\$3,000.00	\$3,000.00	\$3,000.00	The funds in this grant will be used to pay the day-to-day expenses for the operation of the territory.	The funds in this grant will be used to pay the day-to-day expenses of the territory relative to banking, travel, office supplies, correspondence, training and education, etc.
Pony Express Territory	PE-17-02	Pony Express Territory	OHV Digital App With GPS Trailheads	\$30,000.00	\$15,000.00	\$30,000.00	Funds will be used to purchase a proprietary app platform with a web-based control panel for uploading selected territory and trail information. Funds will also be used to map the trailheads and include the following features: create 25 virtual signs with up to 200 words each with photos, create 15 informational pages with up to 4500 words and photos, create four fun facts pages, give the user the ability to post and share GPS-tagged sightings and photos, create a section that highlights local businesses all under a white label design that can be customized by the PET.	This project creates a GPS-based app marking OHV/ATV trailheads in each community in the Pony Express Territory. There is a burgeoning market for this app as more consumers are buying four wheel, side by side OHVs that enable families to more conveniently go off road (typically older and more affluent). The app will also appeal to the more traditional ATV user (typically male, and skewed younger). The app will create a demand for trail riding in the PET as users will be able to precisely identify trailheads. The app will not require Wi-Fi connectivity (as it is satellite-based), and has interactive features that encourage photo and story sharing, game play, community histories and trail descriptions that will appeal to the outdoor recreationalist. This app creates a ready activity that can be done in each PET community all year round, a reason to visit each community for the outdoor user, and an opportunity to create visitor spend in each PET community. The visitor will engage in other activities while riding trails including exploring, watching wildlife, hunting, fishing, camping, photography, dining out, among others.

Travel Nevada funded a complete redesign of the RTT website in 2014 and at that time the territory engaged the services of a digital agency to manage the site and associated projects. Since 2015 the top countries for visitors to the site has changed, now including Germany, India, Brazil and France in the top seven. This demonstrates their targeted efforts and sales lead follow-up are working to get potential visitors and travel planners to view the site. They would like to expand the scope of work to include managing all digital assets of the territory and also to facilitate online marketing of the site through various channels. One option that is being explored is the Travel Nevada partnership with Madden Media where RTT might buy a Video Marketing package to promote the itinerary videos which were funded in 2015 and 2016.
